Telephone:....BH..... AH

Fax:..... Email:.....

Solar Hot Water System Details

Collector Panels: Area (sq.m)..... purchase date.....

Pump purchase date.....

Hot Water Tank Volume (litres).....purchase date (if applicable):.....

Declaration: I have installed a north-facing **Nuclear Fusion Primary Heat Exchanger**¹ (K4 solar water heating system of *at least* 250 litre tank size with *at least* 4 sq. metres of solar collector panels) on my primary place of residence between 10th December 2000 and **Friday 7th September 2001**. In entering the draw to win this reward, I agree to use my best endeavours to keep the premises continuously occupied by at least 2 persons, and to operate the water heating system in accordance with the suggestions in the construction article¹ for optimising its performance. I agree to keep the system maintained, and retain its access to sunlight every day between 9am and 3pm in all seasons for a period not less than five years. To the best of my knowledge, the installation complies with Tasmanian building and plumbing codes, and all relevant work has been checked and connected by a licenced plumber and electrician.

I am not a Tasmanian state politician, or a family member of a Tasmanian state politician. In the event that my envelope is drawn first in the ballot, I agree to allow Dr Gunter or his appointed representative to inspect the installed system, and the tax invoices relating to its components, before the reward is paid to me.

Signed: Date:

Fully completed and valid entry forms must be mailed to '**Nuclear Fusion Power Incentive**', PO Box 2111, Lygon Street North, Brunswick East Vic 3057, and arrive by last mail **Friday 21st September 2001**
